<p&qt;Explanation of Overcard&lt;/p&qt; <p&gt;The term overcard describes a card being higher in rank with</p&gt <p&qt; relation to another card (or group of &#128182; cards). Here are two common examples.</p&gt; <p&gt;Example 1 </p&gt; <p&gt; In Hold em we have a big pair preflop (JJ) and the flop &#128182; tex ture comes down as KQx. We&It;/p&qt; <p&qt; could describe this by saying that there are two overcards on the fl op.</p&qt; <p&gt;Example 2 &#128182; </p&qt; <p&qt; We have AQo and the flop comes down 952 rainbow. We could describe thi s by saying we</p&qt; <p&gt; flopped naked &#128182; overcards .&lt;/p&gt; <p&gt;Example of Overcard used in a sentence -&gt; We got the money in&lt;/p& gt; <p&gt; with our pocket Queens and really hoped &#128182; that the board woul dn t bring any</p&gt; <p&gt; overcards.&lt;/p&qt; <p&gt;How to Use Overcard as Part of Your Poker Strategy&lt;/p&gt; <p&gt;When flopping a pair in&lt;/p&gt; <p&gt; &#128182; Hold em, it is vulnerability often depends on how many overc ards might fall on the later</p&gt; <p&gt; streets. Lower pairs are more susceptible &#128182; to being outdrawn since there are simply more</p&gt; <p&gt; overcards that can hit. A high pair such as Queens however is &#128182 ; less vulnerable to being</p&gt; <p&qt; outdrawn since there are only two overcards that can potentially give our opponent a</p&gt; <p&qt; higher pair, &#128182; i.e. the Ace and the King.&lt;/p&qt; <p&qt;See Also&lt;/p&qt; <p&gt;&lt;/p&gt; Autor: shifthouse.com
