BetRivers is a play-for fun social casino. Unlike real money casinos, where you bet real dollars and cents to play the game; the videogames on BetReves can only be played with Virtual Credits or VC. VC have no inherent monetary value and cannot be redeemed for prizes or cashed out. The only prizes offered are virtual prizes. The only prizes available are those accessible via play-points, which you earn with every spin; but none of them can be redeemed for real money.
