

spin samurai kasino

Emojis have made their way to the heart of social media, messaging, and connecting our feelings to a visual image in everyday life which has become impossible to ignore. Feelings expressed in pictures range from light, calm and cool moods to more intense and fiery ones, spinning on the reels. Alongside ordinary symbols, look for the full body emojis that can cover the whole reel: ecstatic ballerina, a hip 70s disco dancer, and a fierce Samurai warrior. This incredible 5-reel, 3-row, 10-line casino game by Endorphina is called Slotomoji slot. It's inspired by those popular, miniature, and catchy pictures (emojis) that have become deeply engrained into the way we digitally communicate. Emojis are ideograms that have first originated on Japanese mobile phones in the late 1990s but have quickly adopted themselves into the language of modern smartphones. Endorphina's Slotomoji brings emotions to life with striking colors and chances of winning big. Special full body emojis can arrive on the 2nd reel (ballerina), 3rd reel (disco dancer), or 4th reel (samurai) triggering unlimited respin feature. Emoji stays on the reel and acts as a Wild while the rest of the reels respin. After each respin without the win the multiplier rises for the 7th next respin. When a win lands then it is multiplied by the current value of the multiplier.

THIS GAME HAS BEEN APPROVED BY MGA
The BONUS POP feature may not be available in all casinos, depending on the jurisdiction.
