If the spread is set at +7, The underdog must either win the game outright or lose by fewer than seven points in order to cover. For its favorite to win, they must win by more than seven points! What is a split in sports betting? Forbes.com: When odds are expressed with a minus sign, the favorite must win by the spread to cover. For example, a -200 bet means you must win \$200 to receive \$100. If you bet \$100 and win, you would receive a total payout of \$300 (\$200 profit + \$100 initial stake). How do odds work in betting? - Investopedia: Betting odds are a way of expressing the probability of an event occurring. They are used to determine the amount of money that will be paid out if a bet is successful. Betting odds are typically expressed as a ratio of two numbers, such as 1.50 or 2.00. A 1.50 bet means that for every \$1 you bet, you will receive \$1.50 if you win. A 2.00 bet means that for every \$1 you bet, you will receive \$2.00 if you win. Betting odds are also used to determine the amount of money that will be paid out if a bet is successful. For example, if you bet \$100 on a 2.00 bet and win, you will receive a total payout of \$300 (\$200 profit + \$100 initial stake). Betting odds are also used to determine the amount of money that will be paid out if a bet is successful. For example, if you bet \$100 on a 2.00 bet and win, you will receive a total payout of \$300 (\$200 profit + \$100 initial stake).

This is a common American betting strategy. A bettor could place a bet of \$200 on a team to win. If the team wins, the bettor would receive a total payout of \$300 (\$200 profit + \$100 initial stake).
